

QUICK START GUIDE

| SPECIFICATIONS | |
|------------------------|--|
| VIDEO | |
| HOST INTERFACE | (8) DisplayPort 20-pin F |
| USER CONSOLE INTERFACE | (1) DisplayPort 20-pin F |
| MAXIMUM RESOLUTION | 3840 x 2160 @ 30 Hz |
| DDC | 5 volts p-p (TTL) |
| INPUT EQUALIZATION | Automatic |
| INPUT CABLE LENGTH | Up to 20 ft. (6.1m) |
| OUTPUT CABLE LENGTH | Up to 20 ft. (6.1m) |
| USB | |
| SIGNAL TYPE | USB 1.1 keyboard and mouse only |
| USB CONNECTORS | 8-Port SH: (8) USB Type B; 8-Port SH w/CAC: (16) USB Type B |
| USER CONSOLE INTERFACE | Both: (2) USB Type A for keyboard/ mouse connections; 8-Port SH w/CAC: (1) USB Type A for CAC |
| AUDIO | |
| INPUT | (8) 3.5-mm female stereo connectors |
| OUTPUT | (1) 3.5-mm female stereo connector |
| POWER | |
| POWER REQUIREMENTS | (1) 12-VDC, 3-A power adapter with center-pin positive polarity |
| ENVIRONMENT | |
| OPERATING TEMPERATURE | 32 to 104° F (0 to 40° C) |
| STORAGE TEMPERATURE | -4 to +140° F (-20 to +60° C) |
| HUMIDITY | 0 to 80% relative humidity, noncondensing |
| OTHER | |
| EMULATION | Keyboard, mouse and video |
| USER CONTROLS | Front-panel buttons |

WHAT'S IN THE BOX

| PART NUMBERS | |
|-----------------|--|
| SS8P-SH-DP-U | 8-Port, Single-Head, DisplayPort |
| SS8P-SH-DP-UCAC | 8-Port, Single-Head, DisplayPort, with CAC |

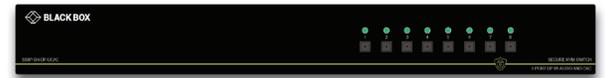

QUICK START GUIDE

EDID LEARN

The KVM switch is designed to learn a connected monitor's EDID upon power up. In the event of connecting a new monitor to the KVM, a power re-cycle is required.

The KVM switch will indicate the unit's EDID learn process is active by flashing the front panel's LEDs in sequential order. Starting with the LED above button "1" on the front panel, each LED will flash green for approximately 10 seconds upon beginning the EDID learn. Once all the LEDs stop flashing, the LEDs will cycle and the EDID learn will be complete.

If the KVM switch has more than one video board (such as dual-head and quad-head models), then the unit will continue to learn the EDIDs of the connected monitors and indicate the progress of the process by flashing the next port selection green and push button blue LEDs respectively.

A monitor must be connected to the video output port located in the console space at the back of the KVM switch during the EDID learn process.

If the read EDID from the connected monitor is identical to the current stored EDID in the KVM switch, then the EDID learn function will be skipped.

A full Manual can be downloaded from:

HARDWARE INSTALLATION

1. Ensure that power is turned off or disconnected from the unit and the computers.
2. Use a DisplayPort cable to connect the DisplayPort output port from each computer to the corresponding DisplayPort IN ports of the unit.
3. Use a USB cable (Type-A to Type-B) to connect a USB port on each computer to the respective USB ports of the unit.
4. Optionally, for CAC models, connect a CAC (Common Access Card, Smart Card Reader) to the CAC port in the user console interface.

QUICK START GUIDE

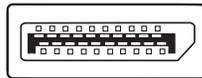

5. Optionally, connect a stereo audio cable (3.5-mm to 3.5-mm) to connect the audio output of the computers to the AUDIO IN ports of the unit.
6. Connect monitor(s) to the DisplayPort OUT console port of the unit using a DisplayPort cable.

NOTE: You can connect one monitor to the single-head KVM switch and two monitors to the dual-head KVM switch.

7. Connect a USB keyboard and mouse in the two USB console ports.
8. Optionally, connect stereo speakers to the AUDIO OUT port of the unit.
9. Finally, power on the KVM switch by connecting a 12-VDC power supply to the power connector, and then turn on all the computers.

NOTE: The computer connected to port 1 will always be selected by default after power up.
